**Gene Webster, DVM**

**Shayla Mihelich, DVM**

**Parvo Take Home Instructions**

“ \_\_\_\_\_ ” medications are labeled. Please follow directions.

We are sending home:

\_\_\_\_\_ – antibiotic

Reglan – anti-vomiting medication

Give Reglan 30 – 60 minutes prior to offering water and giving antibiotics.

Withhold food until vomiting has stopped.

Offer **SMALL** amounts of water frequently.

When vomiting stops, begin offering boiled rice/boiled hamburger (drain fat **WELL**) at a 2 - part rice to 1 - part hamburger ratio. Feed small portions (1/4 cup) every 2 – 3 hours. Increase quantities over 2 – 3 days and slowly add in normal diet.

**\*Disinfect\***

Cleaning solution: ½ cup bleach to one gallon of water.

Clean all treatable surfaces the pet has had contact with using the solution. Clean all food and water dishes as well.

Wash all clothing and bedding the pet has had access to.

This will all help eliminate the virus in the area.

Do not get a new unvaccinated puppy for one year; doing this is usually a sure way to have another puppy with Parvo. A new completely vaccinated dog may be introduced after 3 – 4 months; this dog should be at least 4 months old.

Start vaccines \_\_\_\_\_.

**Please call us with any questions or updates.**
